

Sudco Exhaust Systems

■ Sudco Pipe
■ Stock Pipe

These highly polished stainless steel Sudco pipes are made in Japan exclusively for Sudco. The fit and finish of these robotic welded exhaust systems is every bit as nice as our titanium systems. The canisters are made of a beautiful carbon fiber material with a nice even weave and beautiful shine. You will have sound, power and a great looking exhaust system. Most configurations allow for oil filter removal and retention of the center stand.
